## notes

The product is completely biodegradable and recyclable. Special runs available upon request.

The Company reserves the right to modify the technological features of the product in relation to market requirements.

Food Contact MF - Origin papers and boards are ideal to the production of any paper and commercial products. Particularly appreciated in productions for the creation of packaging and graphic coordinates.

applications

Suitable for the main printing technologies, excellent results are obtained with U.V. It lends itself to the production of boxes, cases, trunks and bags for primary and secondary packaging of food products. Good results in the main packaging processes: cutting, die-cutting, creasing, folding and gluing. Solid background prints with large amounts of ink must be evaluated in advance.

printing and converting  
suggestions

Food Contact MF - Origin complies with the most important Italian and international regulations and laws. Suitable for contact with food products - as indicated in the relative Declaration of Conformity - the papers in the range, they satisfy the Italian Ministerial Decree requirements of 21/03/1973 and of the Decree 777/82 and subsequent updates and modifications. They are also made according to the good practices of manufacturing (GMP) and comply with the requirements of the EC 1935/2004 and EC 2023/2006 community regulations. In particular for compliance with EC regulation 1935/2004, has passed the tests for the verification of organoleptic inertia (taste and olfactory sensory analysis) according to the UNI EN 1230-1 and 1230-2 standards. The range meets the requirements of the German Recommendations BfR XXXVI Paper and cardboard for food contact (Papiere, Kartons und Pappen für den Lebensmittelkontakt). It complies with the French Décret Law n. 766/07 - and subsequent updates and amendments - and procedure DGCCRF Fiche MCDA n.4 suitability for food contact of organic materials based on vegetable fibers intended to come into contact with food " It also complies with the French Law, Loi n. 2010-729 and subsequent amendments. The production site of the range is BRC-IoP certified.
