

FEDRIGONI

PAPER

OLD MILL

Uncoated papers and boards, certify FSC® and made with E.C.F. pulp. Felt marked on both sides. Substances over 250 gsm are multi-ply laminated in the formation stage. Available in Premium White, White and Ivory colours.

unit of measure

Brightness (col. Premium White) - ISO 2470 (R457) - 105% ± 2
Brightness (col. White) - ISO 2470 (R457) - 90% ± 2
Relative Humidity 50% ± 5
ref. TAPPI 502-98

The product is completely biodegradable and recyclable.
Special runs available upon request.

ECOLOGICAL FEATURES

Envelopes available on stock.

NOTES

OLD MILL

Old Mill is a high-quality finely felt marked paper for de luxe publications and editions, important commercial printing as well as institutional brochures, annual reports, monographs.

APPLICATIONS

Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography and screen printing. The macro-porous surface suggests the use of oxidative drying inks. The chromatic and tone performance is good, the ink load, the dot gain, and the print contrast are at the best levels attainable from uncoated paper.

PRINTING SUGGESTIONS

Varnishing and plastic laminating must be assessed in advance. The varnishing coated with an offset machine is almost fully absorbed and therefore does not improve gloss or protection. Screen-printing varnishing achieves better results, although it is often necessary to perform two shots to achieve a distinctly evident result. The surface roughness typical of felt marked papers may give rise to micro defects with plastic laminating caused by incomplete adhesion of the film to the substrate. Good results with major processing operations such as: cutting, die-cutting, scoring, folding and glueing.

CONVERTING SUGGESTIONS
