STUCCO OLD MILL

Stucco Old Mill papers and boards are ideal for any kind of publishing, packaging and commercial printing. They are held in high regard for de luxe publications, brochures and commercial printings - wherever the need is to exploit the features of a marked paper with the merits and the printing performance of coated paper.	APPLICATIONS
Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography and screen printing. The macro-porous surface suggests the use of oxidative drying inks. The characteristic felt marking requires specific printing pressure settings.	PRINTING SUGGESTIONS
Good results in varnishing and plastic laminating. The surface roughness typical	CONVERTING

of marked papers may give rise to micro defects with plastic laminating caused by incomplete adhesion of the film to the substrate. Good results with major processing operations such as: cutting, die-cutting, scoring, folding and glueing.

CONVERTING SUGGESTIONS
