

SYMBOL GIFT CARD BOARD

Environmentally friendly FSC® certified Symbol Gift Card Board, is design-engineered specifically for gift card applications. Symbol Gift Card Board is double blade coated on both sides with a Satin finish and a high level of whiteness and brightness due to its 100% FSC® certified virgin fiber composition. Available in Premium White shade. The range is laminated off-line. Excellent performance in Key technical parameters such as Stiffness and excellent printability on both sides. Symbol Gift Card Board has been specially developed by our R&D team to ensure an optimum quality gift card with high processing performance. A great choice for brands wishing to choose a renewable and fully recyclable alternative to traditional plastic gift cards.

TECHNICAL FEATURES

Standard instrument/
unit of measure

Brightness - ISO 2470 (R457) -
104% ± 2 (Coated side).
CIE Whiteness - 139.5 ± 4
(Coated side).
Nuance L* 94,5% ± 1,0
a* 2,9% ± 0,8
b* - 11,9% ± 0,8

Relative Humidity 55% ± 5 ref.
TAPPI 502-98

Fully recyclable in the paper stream according to the Atilcelca® 501 assessment method, achieving the highest possible A+ grade. Life Cycle Assessment (LCA) available on request.

ECOLOGICAL FEATURES

Special runs available upon request. Ask your Paper Consultant for A4 and B1 Samples.

NOTES

SYMBOL GIFT CARD BOARD

Symbol Gift Card Board has been design-engineered to have excellent performance in the production of gift cards, loyalty cards and membership cards.

APPLICATIONS

We recommend leaving the paper in its wrapping for 24 hours in the printing room prior to printing. If the need is to print in multi-colour, we recommend working in a conditioned room, or taking necessary steps to control moisture and maintain dimensional stability

STORAGE/HANDLING SUGGESTIONS

Symbol Gift Card Board can be used without problems in all major printing systems: offset, UV offset, blind embossing, hot foil stamping, cold foil stamping, screen-printing and digital varnish enhancement (Scodix® or MGI®). In order to ensure the best printing performance we recommend the use of UV inks . Good results can be achieved with oxidizing inks and a protective UV or water-based varnish.

PRINTING SUGGESTIONS

Symbol Gift Card Board has been developed to work well in all key converting processes: Magnetic stripe application, scratch and peel off panels, signature panel, barcoding, affixing and die-cutting.

CONVERTING SUGGESTIONS
