FEATURES

SYMBOL SKIN BOX

Symbol Skin Box is a paper specially designed for lining rigid boxes or hard covers. Its high quality physical-mechanical characteristics, together with an excellent printing result, make it ideal paper for converting applications.

APPLICATIONS

It's fully compatible with the main printing systems, including offset, blind embossing, hot foil stamping, thermography, and screen printing. Excellent printing performance is guaranteed with UV offset printing and with the application of an overall protective varnish. The characteristics of the top-coated side are comparable to those of our Symbol Freelifa Satin finish.

PRINTING SUGGESTIONS

Good results are obtained with all major processing operations such as: cutting, die-cutting, folding, gluing, varnishing and plastic lamination.

CONVERTING SUGGESTIONS
